

# Hydraulic Design Team Leader Engineer TU/ETH - Vevey

**World leader in the growing market of the rehabilitation and modernisation of hydro power plants – natural and renewable energy – we offer to our approximately 550 employees in our setups from Kriens, Vevey, Zurich and Jonschwil, positions which allow to take up a new challenge thanks to our high quality products.**

## Your tasks

- Operational management of the hydraulic design team via the Vevey and Kriens sites
- Preparation of competitive hydraulic designs for Francis turbines and pump turbines, with responsibility for adherence to design processes
- Further development of Francis-turbine and pump-turbine technology, as well as design tools
- Orientation of layout towards market requirements
- Supervision and coordination of internal, transnational and external research and development projects (universities, other tertiary institutions)
- Participation, and representation of groups, at external conferences and meetings
- Positioning of the team within the global ANDRITZ HYDRO technology organisation

## Your profile

- Masters degree (from Swiss federal institute of technology (ETH) / technical university) or PhD, good knowledge of fluid mechanics and turbomachinery
- Skills in the use of calculation software
- Good language skills in French, English and German
- Service orientation, research-oriented curiosity
- Team skills, intercultural competence, willingness to learn
- Orientation towards goals and solutions, flexibility, leadership, keen holistic thinking, high level of quality awareness
- Experience in the management of teams
